Lab: Misconfigured Kube API Server

Hands on Lab For Students

- Based on URL `<Trainer's_IP>:8001` generated in the previous setup.

Public IP of misconfigured Kube API server to be provided.

- For Trainer: Use the below command to get the Public IP to the Kube API Server Endpoint.

```
echo $(curl -s  ifconfig.me):8001/api/v1/namespaces
```

- Access the Kube API Server Endpoint.

```
http://<Trainer's_IP>:8001
```

- Access the namespace

```
http://<Trainer's_IP>:8001/api/v1/namespaces
```

Cleanup

- Run the `ctrl +c` after the unauthenticated dashboard lab is complete.
